

HEALING COMMUNITIES STUDY

The HEALing Communities Study aims to reduce opioid overdose deaths in highly affected Kentucky communities. Through HCS, a local coalition directs efforts to increase naloxone access, expand treatment with medications for opioid use disorder, and improve prescription opioid safety.

HCS will be in your community until the end of 2023. Our success relies on the participation of local health care professionals like you.

HCS IS A RESOURCE FOR PHARMACISTS AND TECHS

Updates & Outreach

An HCS pharmacist will occasionally stop by your pharmacy to bring you information and resources relevant to community pharmacy practice.

We know you're busy, so our visits will be brief!
